

TRUSTED SUPPLIER TO THE MEDICAL SECTOR

G+N MEDICAL

The Griff Grip®

The Griff Grip® is the ideal container for all your biohazardous material. Capacities available 30, 50 and 60 litre.

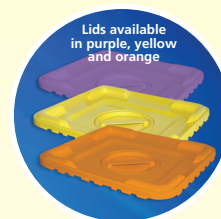

To provide safety in movement we can supply a Pedal frame, which avoids manual opening of the cover and facilitates its transport.

Along with its hinged lid the Griff Grip® unique 'rabbit's teeth' feature allows all three sizes to be closed either temporarily or permanently.

Anatomically designed handles make lifting easier.

Lids are available with or without porthole opening.

Available in different colours if bought in quantity.

TECHNICAL DETAILS

Model	Weight (Product)	Weight (Volume)	Real Capacity	Dimensions
