

## Swabs

### Swabs, disposable, plain

High quality medical grade polypropylene ensures all swab tubes are non-toxic and have low moisture permeability. Every swab has a tamper evident seal and is printed with a lot number, expiry date and full description. Supplied sterile.

Cat. No	Code	Description	Case Qty	Guide Price
SW/13002	F150CA	Plain swab, wooden shaft	100	12.69
SW/13004	F155CA	Plain swab, plastic shaft	100	12.69
SW/13006	F160CA	Plain swab, wire shaft	100	21.29
SW/13012	F168CA	Plain swab, twisted wire shaft	100	85.58
SW/13008	F152CA	Charcoal coated swab	100	19.93
SW/13014	165KS01	Plain swab, wooden shaft, individually wrapped, sterile	2500	102.29
SW/13016	165KS100	Plain swab, wooden shaft, sterile, bulk wrapped	2500	113.60
SW/13020	170C	ATP free swabs for bioluminescence tests	100	26.83

SW/130

### Swabs, disposable, transport

All Sterilin swabs carry the CE mark for class IIa medical devices. The swabs unique packaging system combines a nitrogen flushed aluminium inner bag with a laminated film pouch to keep the product as fresh as the day it was manufactured. Each tube is printed with a lot number, expiry date and has a tamper evident sleeve ensuring complete traceability and guaranteeing sterility. There are 50 pieces per aluminium inner bag and 500 swabs in each case.

Cat. No	Code	Description	Case Qty	Guide Price
SW/13132	18108CST	Transport swab, amies, plastic shaft	500	115.80
SW/13134	18144CST	Transport swab, amies with charcoal, plastic shaft	500	115.80
SW/13136	18110CST	Transport swab, amies, minitip, wire shaft	500	171.05
SW/13138	18116CST	Transport swab, amies with charcoal, minitip, wire shaft	500	239.14
SW/13140	18190CST	Transport swab, amies, twisted wire shaft	500	528.05
SW/13142	18192CST	Transport swab, amies with charcoal, twisted wire shaft	500	528.05
SW/13144	18111CST	Transport swab, stuart agar, plastic shaft	500	171.05
SW/13146	M408C	M40 Transport swab amies, plastic shaft	500	141.29

SW/131

### Swabs, disposable, viral and chlamydia

Sterilin transport swabs with special media for the optimal recovery of viral pathogens or Chlamydia and carrying the CE mark for class IIa medical devices. These swabs are individually wrapped in Sterilin's unique, plastic film pouch within an outer, nitrogen flushed, aluminium pack. The swabs are supplied sterile and in case quantities of 25.

Cat. No	Code	Description	Case Qty	Guide Price
SW/13252	144C	Chlamydia, plastic shaft	25	17.28
SW/13254	145C	Chlamydia, aluminium shaft	25	18.61
SW/13258	147C	Virus, plastic shaft	25	17.28
SW/13260	148C	Virus, aluminium shaft	25	18.88

SW/132

SW/133

## Swab rinse kits for environmental sampling

Enables easy monitoring of bioburden levels on surfaces and equipment. Sterile sampling templates (10cm x 10cm) allows accurate microbial loading of surfaces to be calculated. Alginate tipped swabs dissolve fully to ensure complete delivery of microbial sample into the SRK solution.

Cat. No	Code	Description	Case Qty	Guide Price
SW/13372	902C	Swab rinse kit with standard alginate tip	25	17.07
SW/13374	903C	Swab rinse kit with alginate tip swab	25	33.22
SW/13376	904C	Swab rinse kit with large tip swab	25	29.69
SW/13378	905C	Square sampling kit	10	20.60
SW/13380	T2905C	Plastic square sampling template 10cm x 10cm	50	56.15

## Swabs, disposable, dry tip

Sterilised by ethylene oxide. Individually wrapped.

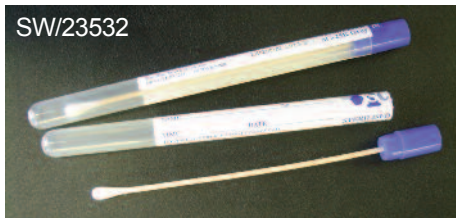

For use when samples do not have to be transported.

Cat. No	Code	Description	Case Qty	Guide Price
SW/23402	TS/8-A	Woodstick swab with a cotton tip	1000	56.39

## Swabs, disposable, non sterile

Dimensions: 150 x 2.5 mm (tip  $\pm$ 5 mm).

Cat. No	Code	Description	Case Qty	Guide Price
SW/23422	TS/10-NS	Woodstick swabs with cotton tip, 100 swabs sealed in a mini grip bag	5000	101.64

SW/23532

## Swabs, disposable, sterile in shockproof tube

Sterilised by ethylene oxide. Individually wrapped in shockproof polypropylene round bottom tubes sealed by the label. Tube dimensions 13 x 165 mm (dia x length).

Cat. No	Code	Description	Case Qty	Guide Price
SW/23532	TS/6-A	Woodstick swabs with cotton tip	500	49.81
SW/23534	TS/19-A	Polystyrene shafted swab with viscose tip	500	48.79

SW/23534

## Swabs, disposable, transport, Amies

Amies medium supports the viability of organisms such as *Trichomonas* sp., *Neisseria* sp., *Haemophilus* sp., *Corynebacteria*, *Streptococci* *Enterobacteriaceae*, etc., for up to 3 days, although the recovery of microorganisms is better if cultured in the first 48 hours.

Amies transport swabs are available with or without charcoal. Swabs are sterilised by irradiation. Peel-pack dimensions: 38 x 210 mm. Expiry date: 30 months after sterilisation date.

Cat. No	Code	Description	Case Qty	Guide Price
SW/23642	TS/5-17	Polystyrene shaft swab with viscose tip	100	21.00
SW/23644	TS/5-18	Polystyrene shaft swab with charcoal viscose tip	100	21.00

SW/23642

## Wooden Applicators

Wooden applicators 150mm long packed in cases of 50 boxes of 72 dozen.

Cat. No	Code	Description	Case Qty	Guide Price
SW/43702	L602/01	Wooden applicators	50 x 864	312.00

Flocked swabs available on request.

## Swabs UriSwab

For the collection, transport and preservation of urine samples. Ideal for use in automation. Simplifies collection of urine samples; unique sponge swab is impregnated with the exact amount of boric acid for the sample collected - no fill line required. Available in rigid or squeezable tube formats.

Cat. No	Description	Case Qty	Guide Price
SW/802CE.A	Sterilin UriSwab	300	337.66
SW/800C	Sterilin UriSwab, squeezable	100	128.75

## Swabs Fecal

Designed for the collection, transportation and preservation of faecal samples. Very versatile - format is ideally suited to automation and standard culture. Capture cap design facilitates plating during manual bacterial culture. Transport medium is semi-liquid Cary Blair - suitable for the transport of enteric bacteria. Aids easy and speedy patient diagnosis.

Cat. No	Description	Case Qty	Guide Price
SW/470CE.A	Faecal swab kit - tube +2ml semi-liquid Cary Blair + regular flocked swab	50	68.83

## Swabs e-Swab MRSA Collection Kit

The new MRSA collection kit simplifies and improves the collection and transport of clinical specimens for the isolation/identification of MRSA. Based on a liquid Amies transport medium it also supports a wide range of aerobes, anaerobes and fastidious bacteria. The kit comprises of three regular flocked swabs that enable collection from the same patient of up to three sampling sites and a tube filled with 1ml modified liquid Amies for the pooling of samples.

Cat. No	Description	Case Qty	Guide Price
SW/493CE	1ml Liquid Amies + 3 regular flocked swabs	50	81.35
