

Urine Collection Kit

A patient focused solution to Primary Urine Analysis

The G+N Urine Collection Kit offers all the components necessary for specimen collection, handling and primary urine testing.

The kit consists of:

- Polystyrene test tube complete with cap and I.D. label
- Collection cup with handle
- Instructions for use
- Polythene mini-grip bag
- 100 kits to a case

We have the ability to tailor the kit to your specific requirements upon request.

- **Saves Money:** Reduction in products required
- **Saves Laboratory Time:** No need to decant, sample ready for analysis
- **Saves the Environment:** By reducing the amount of plastic used

This product assists the patient with urine collection and also enables the laboratory to receive primary urine samples without the need to decant.
