

Safety, waste disposal

Waste container - Griff-Bin®

The Griff-Bin® is a high quality container made from HDPE, developed for the safe handling of clinical waste for incineration purposes. The hermetically sealed lid ensures that once locked, the lid is fully secured and will not open.

Approved to UN 3291 and is available in other colours.

Minimum Order Quantity – 20 units

Cat. No.	Capacity, l	Weight limit, Kg	Guide Price

Waste container - Griff-Grip®

Along with its hinged lid the Griff-Grip® unique 'rabbit's teeth' feature provides a temporary closure facility before the permanent closure is required. Anatomically designed handles make lifting easier. The lids are available in both standard style and 'Port Hole' style- please ask for more information.

Approved to UN 3291 and is available in other colours.

Minimum Order Quantity – 25 units
