Testimonial in respect of the PneumaPress® sequential compression system adopted in 2014 by Surrey and Sussex Healthcare NHS Trust

The Trust recently implemented the PneumaPress® system across both major sites. The equipment itself is easy to use and provides clinical benefits for patients, and the after sales service has been responsive and competent. The implementation was complex, but the G&N staff involved rose to the challenge. The team worked closely with the key staff to deliver the user training required. The system was also able to contribute a financial saving to the Trust CIP.

Louise Evans | Tissue Viability Nurse, Surrey and Sussex Healthcare NHS Trust
