

Swabs Catalogue

Safely collect, transport and preserve microorganisms with G+N's range of swabs

High quality medical grade swabs

Sterilin Plain Disposable Swabs

Sterilin's high quality swab tubes are non-toxic and have low moisture permeability. Every swab has a tamper evident seal and is printed with a lot number, expiry date and full description. All swabs are supplied sterile.

Code	Description	Case Qty
F150CA	Plain swab, wooden shaft	100
F155CA	Plain swab, plastic shaft	100
F160CA	Plain swab, wire shaft	100
F168CA	Plain swab, twisted wire shaft	100
F152CA	Charcoal coated swab	100
165KS01	Individually wrapped plain wooden swab	2500
165KS100	Bulk wrapped plain wooden swab	2500
170C	ATP free swabs for bioluminescence tests	100

Sterilin Disposable Transport Swabs

The swab's unique packaging system combines a nitrogen flushed aluminium inner bag with a laminated film pouch to keep the swab fresh. There are 50 pieces per aluminium inner bag and 500 swabs per case.

Code	Description	Case Qty
18108CST	Transport swab, amies, plastic shaft	500
18114CST	Transport swab, amies with charcoal, plastic shaft	500
18110CST	Transport swab, amies, minitip, wire shaft	500
18116CST	Transport swab, amies with charcoal, minitip, wire shaft	500
18190CST	Transport swab, amies, twisted wire shaft	500
18192CST	Transport swab, amies with charcoal, twisted wire shaft	500
18111CST	Transport swab, stuart agar, plastic shaft	500
M408C	M40 transport swab, amies, plastic shaft	500

Sterilin Swabs For Viral Pathogens

Transport swabs with special media for the recovery of viral pathogens or chlamydia. These swabs are individually wrapped in Sterilin's unique, plastic film pouch with an outer, nitrogen flushed aluminium pack.

Code	Description	Case Qty
144C	Transport swab, plastic shaft (chlamydia)	25
145C	Transport swab, aluminium shaft (chlamydia)	25
147C	Transport swab, plastic shaft (virus)	25
148C	Transport swab, aluminium shaft (virus)	25

Swab Rinse Kits for Environmental Sampling

For easy monitoring of bioburden levels on surfaces and equipment. We offer sterile sampling templates and alginate tipped swabs which dissolve fully to ensure complete delivery of microbial samples.

Code	Description	Case Qty
902C	Swab rinse kit with standard alginate tip	25
903C	Swab rinse kit with alginate tip swab	25
904C	Swab rinse kit with large tip swab	25
905C	Square sampling kit	10
T2905C	Plastic square sampling template (10x10cm)	50

Disposable Dry Tip Swabs

Individually wrapped swabs for use when samples do not have to be transported. Sterilised using ethylene oxide.

Code	Description	Case Qty
TS/8-A	Wooden swab with a cotton tip	1000

Non-sterile Disposable Swabs

Code	Description	Case Qty
TS/10-NS	Wooden swab with cotton tip	5000

Disposable Swabs In Shock-proof Tube

Sterilised by ethylene oxide, these swabs are individually wrapped in shock-proof polypropylene tubes.

Code	Description	Case Qty
TS/6-A	Wooden swabs with cotton tip (13x165mm)	500
TS/19-A	Polystyrene shafted swab with viscose tip	500

Amies Disposable Transport Swabs

Sterilised by irradiation, these swabs support the viability of organisms such as *Trichomonas*, *Haemophilus* and *Streptococci Enterobacteriaceae* for up to 3 days. These swabs expire 30 months after the sterilisation date.

Code	Description	Case Qty
TS/5-17	Polystyrene shaft swab with viscose top (38 x 210mm)	100
TS/5-18	Polystyrene shaft swab with charcoal viscose tip (38 x 210mm)	100

Wooden Applicators

Code	Description	Case Qty
L602/01	Wooden applicators 150mm long	50 x 864

Sterilin UriSwabs

For the collection, transport and preservation of urine samples. A unique sponge swab is impregnated in boric acid and ideal for use in automation.

Code	Description	Case Qty
SW/802CE.A	Sterilin UriSwab	300
SW/800C	Sterilin UriSwab (squeezable)	100

Sterilin™ E-swab and Transport System

Securely collect and transport clinical microbiological specimens. The system features a pre-labelled container with 1ml liquid amies and a flocked swab. Ideal for the collection and transport of clinical specimens container aerobes, fastidious bacteria, viruses and Chlamydia.

Code	Description	Case Qty
480CE	Transport swab, liquid amies, regular flocked swab	50
481CE	Transport swab, liquid amies, minitip flocked swab	50
482CE	Transport swab, liquid amies, pernasal flocked swab	50
483CE	Transport swab, liquid amies, urethral flocked swab	50
484CE	Transport swab, liquid amies, paediatric flocked swab	50

MRSA Collection Kit

Our new MRSA collection kit simplifies and improves the collection and transport of specimens due for MRSA identification. The kit includes regular flocked swabs that enable collection from the same patient of up to 3 sampling sites and a tube filled with 1ml modified liquid amies for the pooling of samples.

Code	Description	Case Qty
SW/493CE	1ml Liquid Amies + 3 regular flocked swabs	50
