

G&N Pelvic Floor Portfolio

CLEAR VIEW SYSTEM

Revolutionary designed and patented 'CLEAR-VIEW system' which protects the light guide to give a clear and unobstructed view of the examination area.

Light guide - LED Illumination

Pull-tab to activate light

SELF ILLUMINATION

Self-illumination eliminates the need for a separate light source, saving time by enhancing throughput of procedures and saving money by reducing the need for capital equipment.

SINGLE USE

Single use saves time and money compared to costly and time consuming cleaning and sterilisation processes required by reusable devices.

Crucially with PROCTOLUX, the risk of cross contamination is reduced.

HYGIENE & DISPOSAL

Cleaning the insufflator can be a challenge in reusable sigmoidoscopes. The reusable models are expensive and so the minimum are purchased. Once contaminated, the rubber tubing must be cleaned, and if fitted, the filter replaced, this is important as the inside of the insufflator cannot be cleaned.

With G&N's pelvic floor disposable range, once the procedure is completed, the whole device, including the attached battery and light, is disposed of into clinical waste.

PROCTOLUX® is a range of single use, fully disposable and self-illuminating proctoscopes for use in diagnosis and treatment of the anal cavity and rectum.

SIGMOLUX® is a self-contained, single use, fully disposable, cable-less and self-illuminating rigid sigmoidoscope system designed to optimise mobility during diagnosis and treatment.

Proctolux Ordering and Size Specification

	Re-order code	Body Length	Internal Diameter	External Diameter
Proctolux 19	702000	97.3mm	18.8mm	22mm
Proctolux 25	702010	79.6mm	22.2mm	25mm

Sigmolux Ordering and Size Specification

	Re-order code	Body Length	Internal Diameter	External Diameter
Sigmolux	701000	210mm	15.4mm	19mm
