

**Retractable Safety Syringes
and Needles**

Passive
needle retraction
directly from the
patient into the
device

Designed for
staff & patient
safety

VanishPoint® products feature passive needle retraction, directly from the patient into the device. This reduces the risk of needlestick injury and eliminates exposure to the contaminated needle.

- ✓ Integrated safety mechanism
- ✓ Eliminates used needle exposure
- ✓ Single-handed activation
- ✓ Hands remain behind the sharp
- ✓ No recapping of needle
- ✓ Easy to use, minimal training required
- ✓ Safe and effective for patients
